IsoFORM[™]

Help protect and
stabilize the lumbar
spine with comfort

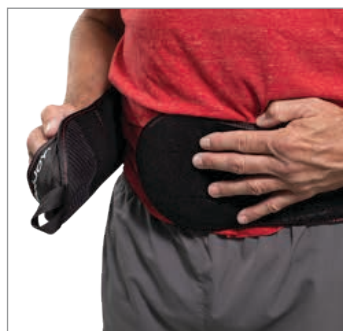

IsoFORM™ Back Braces

Comfortable compression for lower back stability and support

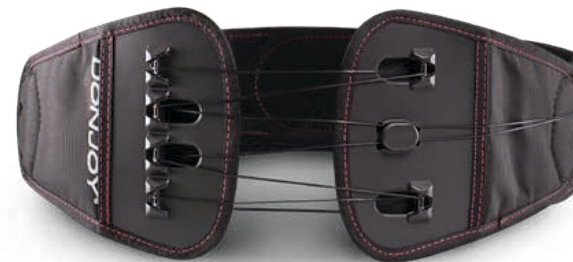

Designed to aid superior lower back protection and stabilization, the new DonJoy® IsoFORM™ back braces help provide support and pain relief for a comprehensive range of chronic and acute indications. Supplement support with hot/cold packs for additional relief.

Adjustable pull tabs help provide targeted compression and help reduce rotation of brace. The pull tab system independently tightens top and bottom allowing patients to localize compression.

Low-profile design is easy to apply and remove. The semi-universal sizing and adjustable belt wings allow clinicians to easily customize the fit for a wide range of patients.

IsoFORM™ – SIO

Flexible, low-profile belt for SI stabilization

- Single ergonomic pull tab compression system helps reduce SI joint motion
- Lightweight design for comfortable extended wear
- Comfortably fits waist sizes from 24-40" and up to 56"

Indications: Sacroiliac pain, dysfunction, lower back pain, sprains/strains, pubic symphysis separation, and pubic symphysis ruptures

IsoFORM™ – LO

Low-profile design to help with minor lower back pain

- Targeted compression helps support fatigued muscles that spasm and cause pain
- Easy to apply and remove
- Helps provide sagittal control and support from L-1 to L-5
- Comfortably fits waist sizes from 28-48" inches and up to 66"

IsoFORM™ – LO+

Similar design as the LO option with an anterior panel to help with more trunk support

Indications: Acute and chronic low back pain, sciatica, lower back sprains or strains, lumbar disc displacement, osteoporosis, disc herniation and degeneration, post-operative laminectomy, post-operative discectomy, spondylolisthesis, pre and post-surgical care

IsoFORM™ – LSO

Trunk stability with motion restriction and pain relief aid

- Limited lumbar flexion and extension helps restrict movement
- Targeted compression helps support fatigued muscles that spasm and cause pain
- Low-profile brace for comfortable extended wear
- Easy to apply and remove
- Helps provide superior sagittal control and support from T9-S1
- Comfortably fits waist sizes from 28-48" inches and up to 66"

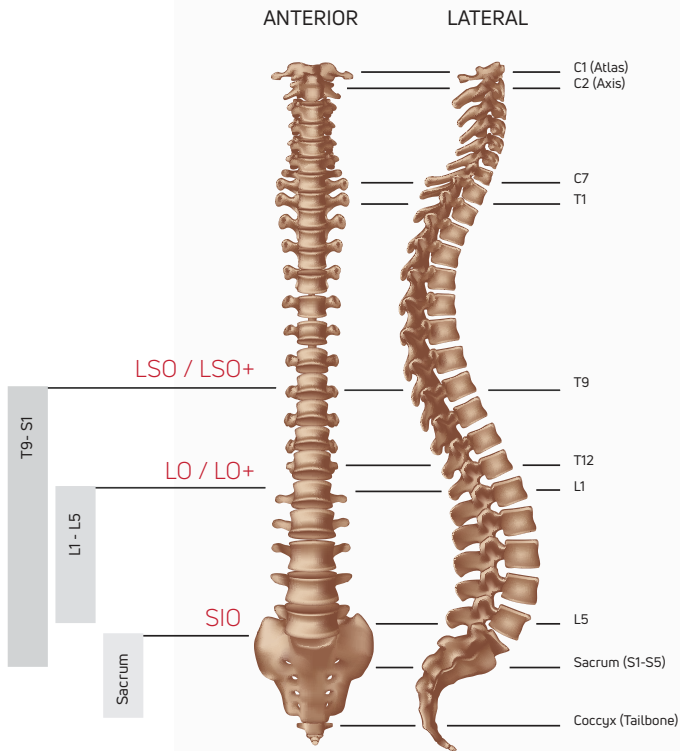

IsoFORM™ – LSO+

Similar design as the LSO option with two lateral extensions to help reduce lateral movement

- Helps provide higher degree of spinal support and relief
- Helps provide superior sagittal and coronal control and support from T9-S1

Indications: Acute and chronic low back pain, sciatica, lower back sprains or strains, lumbar disc displacement, osteoporosis, disc herniation and degeneration, post-operative laminectomy, post-operative discectomy, spondylolisthesis, post-operative fusion, spinal stenosis, stable/non-displaced fractures, pre and post-surgical care
